

Cylinder, Weight 1.5 ton (S.G.Iron)

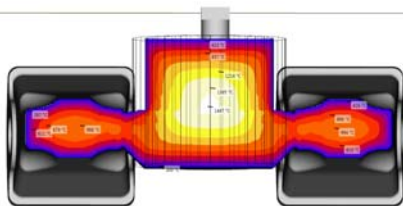

‘First Time Right’ by using Solidification Simulation Software ‘Autocast -X’

Engine Mount, Weight 15.60kg
(S.G.Iron)

Shackle, Weight 8.38kg
(S.G.Iron)

RC Tip, Weight 5.56g
(Cast Steel)

Valuable time - money - efforts are lost in conducting Trails are finalizing gating and risering for producing ‘Shrinkage free’ casting at the first attempt. Simulation on ‘Autocast -X’ will help achieve this even without pouring single casting !

‘AutoCast – X’ simulation will allow the right combination of gating parameters not only to produce sound casting at first attempt but will optimise gross yield which will ensure the best operational efficiency.

NCTS will carry out such studies using ‘AutoCast -X’ to generate comprehensive report on Gating and Risering.

CHARGES RS. 7500 ONWARDS PER SIMULATION

NCTS also undertakes converting a 2D drawing into 3D drawing necessary for Simulation, by using ‘Solid Work’ software.

CHARGES RS. 5000/- ONWARDS PER CONVERSION
